INTRODUCTION

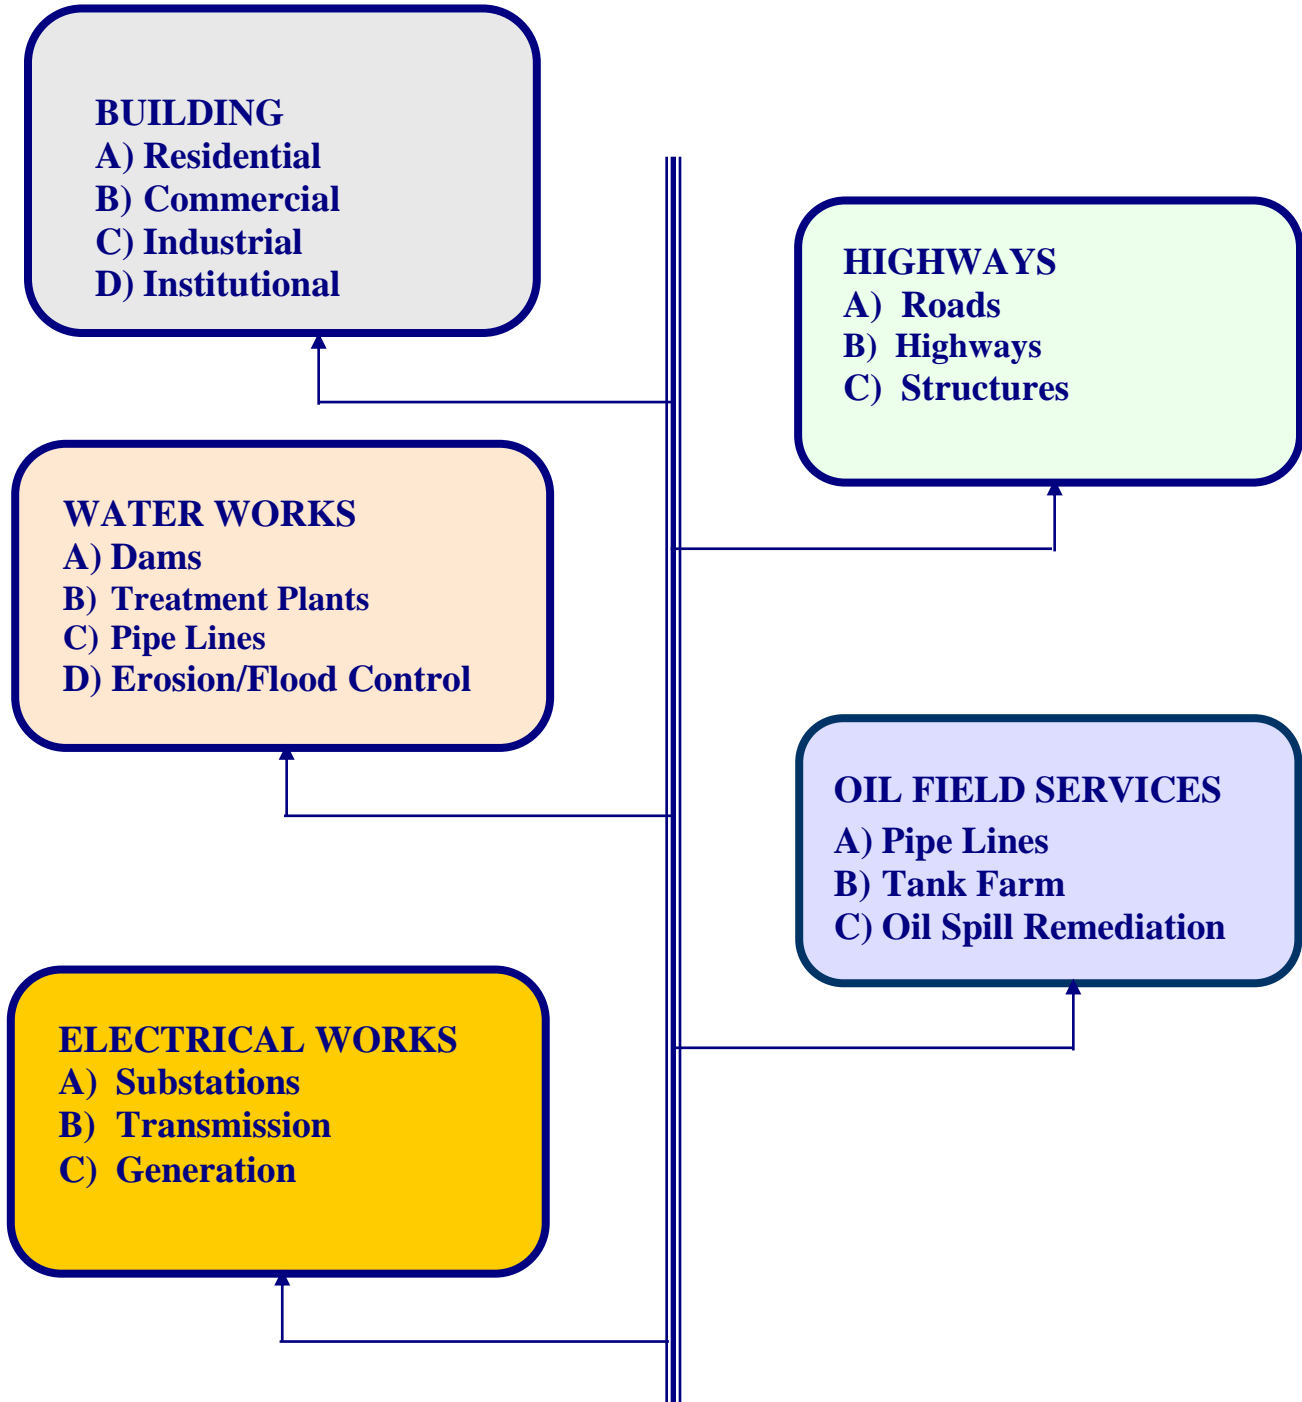

...a name that symbolizes the fusion of widely varied expertise of our founders with proven cognizant experience of our team of highly qualified engineers and technicians, **FIAT** is strategically positioned to provide prompt and quality enhanced construction programs in the building and infrastructure markets of the economy.

FIAT, with a vision to be a leader in the Nigerian construction market, has a mission to provide top quality, dependable and sustainable construction services in building (housing, tower mast and water structures); roadway; water supply; electrical works and oil & gas pipeline projects.

Our excellent history, as the following track record shows, guarantees our performance in an all-embracing field of engineering. The project need not be large or spectacular, nor of enormous cost for **FIAT** to show interest. The unique challenges of projects are the enrichment of the services we provide. Welcome to the world of **FIAT**.
